

ACiQ

Stealth Multi Zone Series

AC Air Conditioning

i Intelligent

Q Quiet Quality

Custom-Made Comfort

ACiQ is revolutionizing the heating and cooling industry with its functionality and custom-made comfort to tailor to any mini split application.

Brilliant Solutions for Any Ductless Need

From intelligent adjustments to customizable settings, ACiQ mini splits allow you to choose how you want to intelligently bring superior comfort to any space.

Intelligent Remote and On-Unit Display

The included wireless remote brings intelligence to your system's control with many intelligent modes to choose from and an integrated LCD screen to help you navigate them. On the unit, there is an LED display that shows any error codes and the temperature as desired.

IntelliHeat Low Temperature Operation

ACiQ brings stealth technology and a high efficiency to low temperature applications with each system's ability to heat and cool easily down to -22°F, much lower than most central heat pump systems that can only operate down to an average of 35°F. This is achieved thanks to ACiQ's IntelliHeat basepan heater technology.

Buy Smarter, Save Longer

All ACiQ mini splits utilize high-efficiency rotary compressors and DC inverter-driven motors that allow each multi-zone system to achieve up to 22 SEER. With a minimum SEER rating in most states of 14 SEER, your new ACiQ system will save you quite a bit of money over the lifetime of the unit in operation costs over almost any standard central ducted system.

Durable Golden-Fin Condenser Coating

All ACiQ condensers have multiple parts that are coated in Golden-Fin technology, allowing the condenser to be resistant to corrosion, rust, and general wear-and-tear.

Multiple Air Handlers, One Condenser

ACiQ multi zone mini split systems are able to cover multiple rooms on the same condenser with each system's ability to connect to anywhere from two to five air handlers depending on the condenser. This saves space in your yard and lowers your overall electric bill over multiple single zone options in most cases.

The Stealth Edge

ACiQ systems introduce a new way to heat and cool. ACiQ Stealth mini splits are engineered with you in mind, offering a high efficiency, quiet operation, and wide operation range. Combined with a 5 year parts and 10 year compressor warranty, Stealth is the intelligent system to make you comfortable.

Max. Zones	Condenser	Max. Rated BTU/Tonnage	SEER/EER	HSPF	Heating Range (°F)	Cooling Range (°F)
2	ACiQ-18Z-HH-M2	18,000/1.5	21.5/12.5	9.8	-22 - 57	-22 - 122
3	ACiQ-27Z-HH-M3	27,000/2.25	22/13	10.4	-22 - 57	-22 - 122
4	ACiQ-36Z-HH-M4	36,000/3	21.5/13.5	10.5	-22 - 57	-22 - 122
5	ACiQ-48Z-HH-M5	48,000/4	21.5/11.6	10.3	-22 - 57	-22 - 122

Suitable. Period.

ACiQ utilizes state-of-the-art technology to be suitable for almost any standard mini split installation. Every feature is designed to keep you comfortable in almost any space, in almost any climate with its integrated IntelliHeat basepan heater technology.

Comfort Gained by Intelligence

Every part of ACiQ systems are specifically designed to make your experience with in-home comfort better. From each system's inverter-driven motors to its intelligent controls, every step of the design process leads to you taking full control of your space's comfort, making ACiQ the intelligent decision for any space.
